Appendix A.....	22
Appendix B.....	22

# 1. Introduction

- 1.1. These regulations govern Spec3 Series racing events held throughout North America.
- 1.2. The Spec3 Series is a competitive, fun, safe, affordable racing series, focused on road racing with limited modifications and specified required components. The series showcases the driver's skills and the specified required components manufacturers, distributors, and dealers.
- 1.3. Only modifications specifically authorized are allowed; and competitive adjustments are not allowed. **Other than the modifications specifically allowed in these Rules, every part of the car must remain as it came from the factory.**
- 1.4. These regulations are 'living' and subject to changes at any time. The stability of these rules allows for this provision as opposed to the typical annual rules update with wholesale changes that occurs on a calendar year basis.

## 2. Sanctioning Body

The National Auto Sport Association (NASA) sanctions Spec3 competitions exclusively. All events are governed by these Regulations, applicable addendums, as well as those found in the latest version of the *NASA Club Codes and Regulations* (CCR). All decisions made by the series administration are final, except under certain conditions, as specified by the CCR.

## 3. Classification

- 3.1. The Spec3 Series has one preparation level with one class.

## 4. Series Championship

- 4.1. The provisions of the NASA CCR Section 22.0 shall apply.

## 5. Rules Compliance

- 5.1. Cheating and non-compliance will be subject to harsh penalties and by act of registration, each driver agrees to the following:
  - 5.1.1. At first offense, there will be a disqualification from the previous two races, and a loss of Championship points from those two races. At a second offense, the penalty will be at the discretion of the Regional Race Director and may include up to a twelve-month suspension from all NASA events.

## **6. General Rules**

### **6.1. Competitive Format**

6.1.1. The Spec3 Competitive Format regarding body contact conforms to CCR Section 25 "On Course Conduct."

### **6.2. Driver Eligibility**

6.2.1. A driver shall possess a valid NASA Provisional or Competition License.

### **6.3. Eligible Vehicles**

6.3.1. Eligible vehicles are listed in Appendix A. Vehicles with automatic transmissions or four-wheel drive are not eligible.

### **6.4. Vehicle Numbers, Class Identification, Decals**

6.4.1. Each car shall display easily read numbers on each side and the front (hood) and rear of the vehicle, of significant size and color differentiation from the body color so as to be clearly seen by timing and scoring officials. Side numbers shall be a minimum of 8 inches high with a 1-1/2 to 2 inch stroke and located on one of the vehicle doors. Hood and rear numbers shall be a minimum of 5 inches tall. In addition, class identification, "SPEC3", shall be displayed near the side numbers a minimum of three inches high. Manufacturer stickers from Koni, Hawk, & RRT Racing must be displayed on each vehicle's front left and right fenders as shown (arrowed) in Appendix B. Manufacturers are responsible for supplying said stickers.

6.4.2. The driver or drivers' last name shall be placed in block print white letters three inches tall centered on each rear quarter panel window and on the lower passenger side front windshield.

6.4.3. Series or NASA officials may require series and sponsor identification (decals) in specific size, contrast and placement to be displayed on cars before being allowed to race.

6.4.4. NASA decals as specified in the CCR are required.

### **6.5. Appearance**

6.5.1. Cars may be painted any color(s).

6.5.2. Cars shall be neat and clean, and shall not be dirty externally or in the engine or passenger compartments.

6.5.3. Cars shall not show bodywork damage outside of CCR 50/50 compliance, and shall not be presented for competition totally or partially in primer.

6.5.4. Graphics, removable or permanent (painted) are permitted and must be tasteful.

## **6.6. Repairs**

6.6.1. All chassis/structural repairs, if performed, shall be in concurrence with factory procedures, specifications, and dimensions. Unless specifically authorized by the manufacturer for repair or allowed by these regulations, no reinforcement, e.g. seam welding, material addition, repositioning or “bending” of shock towers etc., is permitted.

6.6.2. Body repair shall be performed using every reasonable effort to maintain stock body contours, lips, etc.

## **6.7. Fuel**

6.7.1. Permitted fuel is unleaded pump gasoline, with a maximum octane of 93.

6.7.2. Fuel additives, other than stabilizers (i.e. Sta-Bil), are prohibited.

## **6.8. Data Acquisition**

6.8.1. Data acquisition devices are permitted but may not perform a secondary function.

## **6.9. In-Car Adjustments**

6.9.1. No car is permitted any cockpit adjustable system or component, except as specifically allowed in the preparation rules.

# **7. Safety Equipment**

## **7.1. Safety Requirements**

7.1.1. All vehicles and drivers shall conform to NASA’s Club Codes and Regulations (CCR) that are in effect as of the date of the competition. If in conflict, these regulations supersede the CCR.

## **7.2. Tow Eyes**

- 7.2.1. Tow eyes or straps, front and rear, are required. Recommend using straps or folding rings rather than the OEM tow eyes to eliminate protrusions that might cause injury in the pits/paddock.

## **7.3. Fire Systems**

- 7.3.1. All cars without a fire system shall have a fire extinguisher complying with the CCR securely mounted and within the driver's reach.
- 7.3.2. On board fire systems with a minimum five (5) pound capacity may be installed. Outlets shall be directed to driver, engine and, if installed, fuel cell, compartments.

## **7.4. Roll Cages**

- 7.4.1. All roll cage requirements in the CCR shall be met, except for the following:
- 7.4.2. Carpet/padding may be removed. Braces may pass thru interior trim panels.
- 7.4.3. Dashboard may be cut solely to allow passage of roll cage front down tubes.
- 7.4.4. All interior trim may be removed.
- 7.4.5. Door panels may be cut solely to permit passage and attachment of roll cage front and rear hoop braces and side impact bars.

## **7.5. Window Tinting**

- 7.5.1. Tinted REAR windows are specifically disallowed in all classes, and non-OEM tinting is discouraged in all windows. OEM window tinting is allowed.

## **7.6. Airbags and Steering Wheels**

- 7.6.1. Non-stock (except wood rim and chain) steering wheels are allowed. Airbags shall be disconnected or defused during on track sessions and may be removed.
- 7.6.2. Quick release mounting hubs are permitted.

## **7.7. Lug Nuts**

7.7.1. Use of wheel studs to replace lug bolts is allowed, and highly recommended. It is recommended that wheel studs be replaced every two years.

## **7.8. Oil Lines**

7.8.1. All oil lines on the pressure side of the oil pump shall be thread-on connections equal to or better than the factory, (i.e. NO slip-on oil lines to coolers, gauges, etc).

## **7.9. Master Switch**

7.9.1. A master electrical kill switch is required and must be accessible by a harnessed driver as well as rescue personnel.

## **7.10. Catch Tank**

7.10.1. A catch tank for radiator overflow may be installed, but must not perform a secondary function. If a catch can is installed, the factory overflow tank may be removed.

## **7.11. Engine Coolant**

7.11.1. Use of an ethylene glycol (coolant) is prohibited. Substitute coolants (e.g. "Water Wetter") are highly encouraged for all competitors.

## **7.12. Steering Wheel Locks**

7.12.1. Steering wheel locks shall be disabled.

## **7.13. Sunroof Clips**

7.13.1. Sunroof clips are required.

7.13.2. Glass roof tops shall be removed or completely taped over. Use of clear tape is recommended.

## **7.14. Fuel Cells**

7.14.1. Fuel cells that are designed to fit within the spare tire well are permitted.

7.14.2. When a fuel cell is installed the original fuel tank may be removed.

7.14.2.1. When a fuel cell is installed and the original fuel tank is not removed, the original tank shall not be used for any purpose.

## **7.15. Cool Suits**

7.15.1. Cool suits and associated equipment, properly secured, are permitted; providing that the cooler, suit, and associated equipment serve no other purpose than to cool the driver. Cool suit coolers and associated equipment may be mounted anywhere in the passenger compartment or trunk.

## **8. Definitions and Application of the Regulations**

8.1. If the Regulations do not specifically permit a modification, it may not be made.

8.2. "Original" and "stock" mean "as originally fitted for the chassis, model and year of the car."

8.3. "Substituted" means that original OEM equivalent items may be used.

8.4. "Replaced" means that the item may be replaced with items meeting or exceeding OEM specifications.

8.5. "Modified" means that the item may be replaced, machined, welded, ground, cut, or removed

8.6. The interpretation and application of the Spec3 Series Regulations by Spec3 or NASA officials is final and binding. In order to promote the sport of automobile competition, to achieve prompt finality in competition results, and in consideration of the numerous benefits to them, all members, including competitors and officials, expressly agree that:

8.7.1. Determinations by Spec3 or NASA officials shall not be subject to litigation, and they may not initiate or maintain litigation of any kind against Spec3 or NASA or anyone acting on behalf of Spec3 or NASA to reverse or modify such determinations, or seek to recover damages or other relief allegedly incurred or required as a result of such determination.

8.7.2. If a driver, entrant, crew member, guest, or official initiates or maintains litigation in violation of this provision, that person agrees to indemnify and reimburse the National Auto Sport Association for all costs of such litigation, including travel expenses, court costs, witness and filing fees, and reasonable attorneys' fees.

8.7.3. All drivers agree to abide by all applicable rules.

8.7.4. All drivers agree that their likeness or car likeness may be used by Spec3 or NASA in any manner for promotional benefit. Furthermore, all drivers agree that no residuals or payments of any type will become due to them for use of their likenesses.

## **9. Specifications**

### **9.1. General**

9.1.1. All cars in this category shall compete with full road equipment, except as allowed by these regulations.

### **9.2. Weight**

9.2.1. The minimum weight, with driver, for each eligible car is listed in Appendix A. The cars may be weighed at any time during the event.

9.2.2. A car found to be underweight after a qualifying session shall have securely mounted ballast installed in the passenger compartment to meet the minimum weight requirement without exceeding the maximum ballast weight allowed. Alternatively, a spare tire, as defined in 9.3.9.7, may be placed in the spare tire well and appropriately secured. The car shall start at the back of the grid for the race if it meets the minimum weight requirement.

9.2.3. A car found to be underweight after a race session shall be disqualified from the race results and a notation shall be made on the current event page of the car's logbook. The driver shall have the car weighed at the next race or event before qualifying, and shall ensure it meets minimum weight requirements.

### **9.3. Modifications**

#### **9.3.1. Engine**

##### **9.3.1.1. Induction System**

9.3.1.1.1. Air filter elements may be replaced with Green Filter USA Product #2038 ([www.greenfilterusa.com](http://www.greenfilterusa.com)) or K&N Product #33-2070. Other than stock and the two aforementioned replacement options, no other filter is permitted.

9.3.1.1.2. Except as otherwise described in this section 9.3.1.1.2., the stock intake airbox assembly shall be retained unmodified in its original mounting position. The exception to the previous

statement within this section shall allow the removal of the oval-shaped inlet snorkel from the airbox assembly.

9.3.1.1.3. Removal of the driver's side headlight assembly is permitted if replaced with the specified part "S3 Air Duct" as sold by Bimmerparts.com and must be used to only duct air into the stock air intake/ air filter assembly. A hose or duct may be installed to connect the S3 Air Duct to the factory intake airbox.

9.3.1.1.3. Heat shielding is permitted around the air intake/air filter assembly.

#### 9.3.1.2. Component Modification

9.3.1.2.1. Machining for balancing purposes only is allowed.

9.3.1.2.2. All pistons, including aftermarket replacements, must be factory replacement spec and match factory dome, dish, valve relief depth, ring groove placement, weight and wrist pin height; compression must meet factory replacement specifications. The maximum allowable overbore is limited to the largest available factory replacement piston, not to exceed .025 inch.

9.3.1.2.3. Rings may be substituted.

9.3.1.2.4. Engine Bearings and bushings may be substituted.

9.3.1.2.5. Valve guides may be substituted.

9.3.1.2.6. No engine component may be modified in any manner not specifically permitted or authorized by the Factory Service Manual or Factory Technical Bulletins. All competitors are required to maintain, and present upon request, the factory manual, and/or Technical Bulletins that show the modification in question.

9.3.1.2.7. Overhaul procedures, which in any way increase performance beyond factory specifications that are not specifically authorized by these regulations, are prohibited.

#### 9.3.1.3. Fuel System

9.3.1.3.1. Fuel filters may be replaced.

9.3.1.3.2. Any commercially available fuel pump(s), hoses, and fuel tank baffles are allowed. A secondary fuel pump may be installed within the tank with the sole purpose of providing fuel to the primary fuel pump.

9.3.1.3.3. A fuel pump shall not be located in the driver/passenger compartment.

9.3.1.3.4. The stock fuel pressure regulator must be used.

9.3.1.3.5. Fuel lines may be replaced.

9.3.1.3.6. Fuel lines shall not exceed three-eighths of one inch inside diameter.

9.3.1.3.7. Fuel lines that pass through the driver/passenger compartment shall be metal or metal braided and securely fastened.

#### 9.3.1.4. Camshaft and Valve Gear

9.3.1.4.1. All valve sizes, seat dimensions and angles, etc., shall conform to factory specifications.

9.3.1.4.2. All cam dimensions, lift, duration, etc., shall conform to factory specifications.

#### 9.3.1.5. Block

9.3.1.5.1. Compression ratio may be changed only within the tolerances affected by resurfacing for trueness and within factory tolerances or as allowed by these regulations.

#### 9.3.1.6. Oiling System

9.3.1.6.1. Engine oil may be substituted.

9.3.1.6.2. Engine oil filter may be substituted.

9.3.1.6.3. A pressure accumulator/"Accusump" is permitted, and the location of the accumulator within the bodywork is unrestricted, but it shall be securely mounted.

9.3.1.6.4. Oil lines that pass through the driver/passenger compartment shall be metal or metal braided and securely fastened.

9.3.1.6.5. Oil pans, pan baffles, scrapers, windage trays, and oil pickups are unrestricted.

9.3.1.6.5.1. Dry sump systems are prohibited.

9.3.1.6.6. Oil coolers may be added or replaced, and their location within the bodywork is unrestricted so long as they are not mounted within the driver/passenger compartment.

9.3.1.6.7. Oil lines and oil filter housing may be replaced.

#### 9.3.1.7. Engine Management System

9.3.1.7.1. The engine management computer or ECU shall be modified to include required part #Chip\_BWS3 from Bimmerworld (Bimmerworld.com or 877-639-9648). No other changes or modifications are allowed to the ECU or the aftermarket chip.

9.3.1.7.1.1. All cars shall use an E36 325i(s) ECU (DME) Bosch part number 0-261-200-413 or 0-261-203-506.

#### 9.3.1.8. Other Engine Related Items

9.3.1.8.1. Alternate, non-solid, motor mounts, providing the same height as original, are permitted.

9.3.1.8.2. Engine belts may be substituted.

9.3.1.8.3. Hardware items (bolts, nuts, etc.) may be replaced with similar items performing the same fastening function.

9.3.1.8.4. Head gasket(s) may be replaced with any gasket(s) having the same or greater compressed thickness as stock.

9.3.1.8.5. Other engine gaskets may be replaced.

9.3.1.8.6. The application or use of any painting, coating, plating, or impregnating substance (i.e. anti-friction, thermal barrier, oil shedding coatings, chrome, anodizing, etc.) to any internal engine surface, including intake manifolds, is prohibited.

9.3.1.8.7. Cruise control mechanism may be removed.

### 9.3.2. Engine Swapping

9.3.2.1. Cars must have the original engine displacement as corresponding with the VIN number of the vehicle, (e.g. If the original designation of the car according to the VIN (Vehicle Identification Number) was to have a 2.5 liter engine it must be a 2.5 liter engine available in U.S. during those model years).

9.3.2.2. Use of 1992-1998 E36 chassis are permitted so long as a 2.5L Vanos motor, engine wiring harness, engine accessories, and associated hardware are used from a 1993-1995 production vehicle.

### 9.3.3. Ignition/Starter/Electrical Systems

9.3.3.1. Spark plugs, coils, and coil extensions may be substituted.

9.3.3.2. Batteries may be replaced.

#### **9.3.4. Exhaust System**

9.3.4.1. An exhaust is specified and shall be purchased from the Spec3 official supplier:

Mitchum Enterprises Richmond, VA (804)-379-1239

9.3.4.2. Minor adjustments may be made to the Spec Exhaust system to help with fitment. Any adjustment made can serve no secondary purpose.

9.3.4.3. Original exhaust system heat shields may be removed provided any fuel tank is shielded.

#### **9.3.5. Cooling Systems**

##### 9.3.5.1. Radiators

9.3.5.1.1. Any radiator may be used, provided it is mounted in the original location, maintains the same plane as the original core, and requires no body or structure modification to install.

9.3.5.1.2. Mechanical cooling fan and associated assembly (fan, fan belt, fan clutch, and fan shroud) may be removed or replaced.

9.3.5.1.3. Electronically operated fans with manual or automatic actuation may be added.

9.3.5.1.4. Thermostats may be modified, removed, or replaced. Thermostat housings must remain stock.

9.3.5.1.5. Water hoses, water pump, and BMW part #17111723520 Radiator Expansion Tank may be replaced.

9.3.5.1.6. Ducting, shielding, or shrouding solely for the purpose of directing air through the radiator, oil cooler, and power steering cooler is permitted.

##### 9.3.5.2. Air Conditioners

9.3.5.2.1. Air conditioning belts may be removed.

9.3.5.2.2. Air conditioning system may be removed in whole or in part including all non-functioning brackets and bracing.

### 9.3.5.3. Heaters

9.3.5.3.1. Heater hoses may be plugged.

9.3.5.3.2. Heater water control valve(s) may be added or replaced.

9.3.5.3.3. Heater core and hoses may be removed or modified.

### 9.3.6. Drive Line/Drive Shaft

9.3.6.1. Drive shaft may be substituted but must retain all factory specifications (i.e. weight).

### 9.3.7. Steering

9.3.7.1. Steering components may be substituted but must retain all factory specifications.

9.3.7.2. Power steering pump and associated plumbing may be removed.

9.3.7.3. Power steering hoses may be replaced.

9.3.7.4. Power steering belts may be removed.

### 9.3.8. Suspension

9.3.8.1. Vorshlag Motorsport camber plate part number VM-CP-SPEC3 and spring perches part number VM-SP-96S-14 shall be used.

9.3.8.2. BMW 1996-99 M3 front control arms and front control arm bushings shall be used. Specified part numbers are as follows:  
Control Arm Right: 31-12-2-228-462  
Control Arm Left: 31-12-2-228-461  
Control Arm Bushings (sold as set): 31-12-9-069-035

9.3.8.3. Rear Shocks.

9.3.8.3.1. Koni- part number 8240-1115S3 shall be used. In addition, BMW (OEM) Bump Stop Rear 33-53-1-138-109 shall be installed.

9.3.8.3.2. No custom shock valving is permitted.

9.3.8.4. MacPherson front strut inserts.

9.3.8.4.1. Koni insert - part number 8641-1342S3 shall be used. In addition, BMW (OEM) Bump Stop Front 31-33-2-225-377 shall be installed.

9.3.8.4.2. No custom shock valving is permitted.

9.3.8.4.3. The following new or used strut housings shall be modified to Koni part number 8641-1342S3 installation specifications:  
BMW part 31312228007 (Drivers side 1996-99 M3)  
BMW part 31312228008 (Passenger side 1996-99 M3)

Additionally, it is recommended that but not required that Front shock bolts be replaced with the parts:  
Front shock "fit" bolt BMW (OEM) 07-11-9-905-853  
Front shock nut for fit bolt BMW (OEM) 31-33-1-094-516  
Front shock washer BMW (OEM) 07-11-9-931-021

9.3.8.5. Any suspension setting (toe, caster, camber) not requiring machining or modification to factory parts is allowed.

9.3.8.6. The maximum track width shall be determined based upon the total combined offset of the wheel and, if utilized, spacers. The minimum allowable combined offset shall be 20 millimeters for each of the four corners of the vehicle. For example, if a competitor utilizes a 30mm offset wheel with a 5mm spacer, the combined offset shall be equal to 25mm and the measurement would be deemed to be legal. Should that same competitor have utilized a 15mm spacer, the combined offset would be 15mm and the measurement would be deemed to be illegal.

9.3.8.7. Springs

9.3.8.7.1. Either Vogtland Race Springs - part "#9161007" or Swift Race Springs - part "NASA Spec3" shall be used. All four springs must be from the same manufacturer.

9.3.8.7.2. Spring pads may be removed; if retained, a maximum of two pads per spring shall be used.

9.3.8.8. The specified anti-roll bar kit, Eibach part number 2033.32, shall be used.

9.3.8.8.1. Front and rear anti-roll bar end-links may be replaced.

9.3.8.8.2. Disconnecting the front or rear antiroll bar is permitted.

9.3.8.9. Unless specified, suspension bushing material may be substituted.

9.3.8.9.1. Rear sub-frame bushings may be replaced with non-metallic commercially available alternatives if they are 1) marketed as OEM replacement and 2) designed to be installed without modification to the rear sub-frame or sub-frame attachment stud. If OEM rubber bushings are retained, non-metallic inserts (such as Powerflex Rear Sub-frame Bushing Insert) may be utilized for reinforcement.

- 9.3.8.10. Any bolt-in strut or shock tower brace is permitted, unless specified in these regulations.
- 9.3.8.11. Additional reinforcement of rear sway bar pick-up points, rear sub-frame attachment points, front sub-frame engine attachment points, and rear lower control arms is permitted and highly recommended.
- 9.3.8.12. Replacement of rear upper shock mounts is permitted and highly recommended. If replaced, the following part shall be used:  
BMW (OEM) 33-52-6-754-096
- 9.3.8.13. It is suggested but not required that front shock tower reinforcement BMW (OEM) 31-31-2-489-795 AND rear shock tower reinforcement BMW (OEM) 51-71-8-413-359 be used. If installed, material may be removed from the front shock tower reinforcement plates to facilitate alignment settings.
- 9.3.8.14. It is suggested that BMW (OEM) 51-71-8-410-212 front sub-frame cross reinforcement (aka, x-brace) be used.
- 9.3.8.15. All cars shall install BMW (OEM) Ball Joints 33-32-1-140-345 into the rear trailing arm upper and lower ball joints. Additionally, BMW (OEM) Rear Trailing Arm Bushings 33-32-6-770-817 shall be installed. Rear trailing arm bushing shims, from respected vendors such as Vorshlag, Ground Control, RRT, Turner Motorsports, etc, are permitted and highly recommended.
- 9.3.8.16. Up to a 0.13" shim (or washers) may be inserted on each side of the vehicle between the front king pin (part number right: 31211092080 and left: 31211092079) and the front strut housing (see rule 9.3.8.4.3.). If a shim is installed, BMW part number 31311136465 (hex bolt) may be replaced (recommended replacement to be at least Class 10.9 steel hardware).

### **9.3.9. Tires and Wheels**

- 9.3.9.1. Toyo Proxes RA-1 or Toyo Proxes RR in sizes 225/50/15 shall be used. All four tires must be of the equivalent product type.
- 9.3.9.1.1. Commercial tire shaving to any depth is allowed. Tires shall not be modified in any other way.
- 9.3.9.1.2. Four "Toyo Tires" decals (2"x18" size) must be on the car. One decal must be placed on each side of the car as well as one on the front and one on the rear.
- 9.3.9.2. Tires must not have cords showing at any time.

9.3.9.3. Wheels shall be 15 inches by 7 inches, shall weigh a minimum of fifteen and one half (15.5) pounds, and can be any brand, unless otherwise specified in these regulations.

9.3.9.4. Wheel bearings may be substituted.

9.3.9.5. Wheel bearing lubricant may be replaced.

9.3.9.6. Wheel spacers are permitted.

9.3.9.7. An unmodified spare tire/wheel combination, filled only with air, intended for an E34/36/46/38, with only typical commercial balancing weights attached, and weighing no more than 50 lbs. total may be placed in the stock spare tire well. It must be securely mounted with the stock or similar mounting apparatus (i.e. mount cannot appear to be designed to add weight).

### 9.3.10. Brakes

9.3.10.1. The make and material of brake pads must be replaced with the following Hawk part numbers

Front Pads           NBS3F or HB136G.690

Rear Pads            NBS3R or HB227G.630

Pads will be available from [www.Andrew-Racing.com](http://www.Andrew-Racing.com)

9.3.10.2. Brake rotors may be substituted provided they match OEM specifications for the E36 non-M3 application.

9.3.10.3. Cross drilling, grooving, and slotting of rotors is permitted.

9.3.10.4. Rotors may be cryogenically treated.

9.3.10.5. Removal of dust shields (backing plates) is permitted.

9.3.10.6. Brake fluid may be replaced.

9.3.10.7. Flexible rubber brake lines may be replaced with Teflon lined, metal braided hoses.

9.3.10.8. Metal brake lines may be substituted.

9.3.10.9. Parking brake and associated mechanisms, including the parking brake console, may be removed.

9.3.10.10. BMW brake Guide Bushing part #34216869617 may be replaced.

### **9.3.11. Differential**

- 9.3.11.1. The final drive ratio for each eligible car is specified in Appendix A.
- 9.3.11.2. Factory limited slip differentials are permitted, but must retain all factory specifications.
- 9.3.11.3. Finned, larger capacity differential covers may be used.
- 9.3.11.4. Differential lubricant and external differential bushings may be replaced.
- 9.3.11.5. If a limited slip differential is fitted, it must breakaway at 70lb-ft. or less. The lockup will be checked at Impound and within 30 minutes of the conclusion of the race. It will be tested at the center hub nut, using a 30mm socket and commercially available ½” torque wrench. The car will be placed on solid pavement, the right side of the car will be jacked up until the right rear tire is free from the pavement, the transmission will be placed in neutral, and the parking brake, if present, will be released. The torque wrench will be placed at the nine o'clock position with the socket on the center nut. The torque wrench will be set at 70lb-ft. and pushed down. If the differential does not breakaway, a second and impartial similar style torque wrench shall be used in a second test, immediately following the first test. If the differential does not breakaway using the second torque wrench, the car will be disqualified from the preceding race and the DQ will be noted in the car's logbook.
- 9.3.11.6. One hose may be attached to the factory differential vent pipe/fitting and must be connected to a catch tank.

### **9.3.12. Transmission/Flywheel Assembly**

- 9.3.12.1. Transmission shall be an unmodified factory standard five speed manual designated for the US E36 model and shall be stamped with either 23001221836, 23001222393, 23001434407, 23001221837, 23001222400, or 23001434410.
  - 9.3.12.1.1. Engine swap cars assume the characteristics (model/year) of the donor car.
- 9.3.12.2. Transmission lubricant may be replaced.
- 9.3.12.3. Modification to, or replacement of, the external shifter mechanism is permitted.
- 9.3.12.4. Shift knobs may be replaced.

- 9.3.12.5. Alternate, non-solid, transmission mounts, providing the same height as original, are permitted.
- 9.3.12.6. Any clutch disc and pressure plate of original diameter may be used provided that they bolt directly to an unmodified flywheel.
- 9.3.12.7. Balancing of the OEM flywheel/clutch/pressure plate assembly is permitted.
- 9.3.12.7. One hose may be attached to the factory transmission vent pipe/fitting and must be connected to a catch tank.

### **9.3.13. Body/Chassis/Interior**

- 9.3.13.1. Driver and passenger seat may be replaced with any race seat. Front passenger and rear OEM seats may be removed.
- 9.3.13.2. Ballast is permitted, and shall be securely mounted in the passenger foot well, aft of the firewall, and shall be forward of the rear seat riser.
  - 9.3.13.2.1. Ballast shall be in segments no heavier than fifty (50) pounds.
  - 9.3.13.2.2. Ballast may not exceed one hundred (100) pounds maximum. Spare Tire weight per 9.3.9.7 is considered separate from this rule and may be added in addition to the allowed 100 pounds.
  - 9.3.13.2.3. Each segment shall be fastened with a minimum of two (2) one-half (1/2) inch bolts and positive lock nuts of SAE grade 5 or better unless the ballast is mounted using the four (4) passenger seat mounting points and replacement bolts, and shall utilize large diameter, load distributing washers.
  - 9.3.13.2.4. Holes may be drilled in the passenger foot well floor pan for purposes of mounting the ballast and the floor pan may be reinforced for the same purpose.
- 9.3.13.3. Modifications to the underside of the vehicle for the purpose of improving aerodynamics are not allowed.
- 9.3.13.4. Engine and front bumper under-tray panels may be removed. OEM front bumper under-tray panel and supports may be replaced with an aftermarket or fabricated replacement which when viewed from above does not protrude from the front or sides of bumper cover outline, when viewed from the side does not protrude below the bumper cover outline and terminates a minimum of 2 inches from the foremost leading edge of the front sway bar.

9.3.13.5. Ducting to the brakes is permitted, and two openings in the front valance to allow the passage of up to a three (3) inch diameter duct leading to each front brake are permitted for this purpose.

9.3.13.6. Ducting to the oil cooler is permitted, and openings in the front valance to allow the passage of up to a three (3) inch diameter duct leading to the cooler is permitted for this purpose.

9.3.13.7. Fender and wheel openings shall remain unmodified.

9.3.13.7.1. It is permitted to roll under or flatten any interior lip on a wheel opening for tire clearance.

9.3.13.7.2. Non-metallic inner fender liners may be removed.

9.3.13.8. Tools and other 'loose' items must be removed.

9.3.13.9. A driver's side dead pedal/foot rest may be added.

9.3.13.10. Pedal covers may be added.

9.3.13.11. Screening of one-fourth (1/4) inch minimum mesh may be added over all openings in the front of the vehicle, contained entirely with the bodywork of the vehicle.

9.3.13.12. Water temperature, oil temperature, fuel pressure, oil pressure, exhaust temperature, engine RPM speed (tachometer), lap timing instrumentation, and mixture gauges are permitted, but shall be securely mounted and may perform no secondary function.

9.3.13.13. Interior mirror(s) may be replaced with multi-panel, flat panel, or parabolic type mirrors, so long as they do not extend beyond the confines of the interior of the vehicle.

9.3.13.14. Driver's side outside mirror glass may be modified. Mirror housing must remain stock.

9.3.13.15. Two-way radios may be used.

9.3.13.16. Antenna for two-way radio may be added.

9.3.13.17. Trunk compartment trim panels may be removed.

9.3.13.18. On board timing receivers are permitted.

9.3.13.19. Windshield washer fluid reservoirs may be removed.

9.3.13.20. The interior, including carpeting, seats, headliner (to include the leading plastic panel), console, radio/cd/cassette/navigation

systems/trip computers, OEM seat belts, speakers, glove box door, panels under the dash, grab handles, driver and passenger door (front and rear)\_window glass and mechanisms, heating and cooling system interior ducts, excess interior wiring, and sun visors, may be removed.

9.3.13.20.1. Rear side and/or rear passenger door window glass may be replaced with Lexan cut to fit in the stock location and secured. Windshield and rear window must remain glass of oem specification.

9.3.13.21. Door panels may be replaced with 0.060-inch aluminum or comparable material, securely attached to the door.

9.3.13.22. Any door adjacent to a seat equipped with seat belts or harness must be capable of being opened from both inside and outside the car.

9.3.13.23. The sunroof cassette mechanism may be removed so long as a replacement panel is either securely sealed (welded/bonded) or secured in place with retaining clips as specified in the CCR.

9.3.13.23.1. The panel shall be flush with the roofline and of the same material as original.

9.3.13.24. Any sound-deadening/insulation and protective materials may be removed from the interior of the passenger, engine, and trunk compartments.

9.3.13.25. Any undercoating or other protective materials may be removed from the underbody.

9.3.13.26. Hood and trunk pins, clips, or positive action external latches are permitted.

9.3.13.26.1. If pins, clips or latches are used the stock releases and components may be removed.

9.3.13.27. Side moldings, side reflectors, etc., may be removed and attachment holes may be filled. BMW part number 51121960727 (rear trim) may be removed.

9.3.13.28. Other E36 vehicle parts are not permitted (i.e. M3 components are illegal).

9.3.13.29. One welded jack plate may be added per side of the vehicle and serve no other purpose than support the load of the vehicle. The plate shall be rectangular, not greater than one-quarter (0.25) inch thick, not greater than forty-eight (48) square inches, and have no dimension in excess of eight (8) inches. The plate shall be located in between but not less than twenty (20) inches from the wheel wells and not more than three (3) inches from the side (edge) of the vehicle.

## APPENDICES

### Appendix A.

MODEL	FACTORY CODE	ELIGIBLE PROD. YEARS	FACTORY BHP	FACTORY WEIGHT	MINIMUM WEIGHT	LBS/BHP	FINAL DRIVE RATIO
325i & 325is	E36	1993-1995	189	3090	2850	15.08	3.15:1

### Appendix B.
